

## WATCH DISPLAY

- A - MONTH DIAL
- B - MONTH CORRECTOR KNOB
- C - CROWN
- D - CALENDAR DATE WINDOW
- E - DAY CORRECTOR KNOB
- F - 24 HOUR DAY/NIGHT DIAL
- G - DAY DIAL

## TIMESETTING

This watch features four distinct watch face display dials: day, month, date and a 24-hour military sun/moon dial

1. Locate the crown on your Stauer watch (above diagram part C). Due to the crown being machine tightened, it may be a little difficult at first to loosen. Using gentle force, you will need to unlock the crown to make setting adjustments. To unlock the crown, turn the crown counterclockwise (toward you) 5 or 6 times until you feel the crown "pop out" on the spring. Your crown is now unlocked and in the "0" (zero) position. Please note the three crown

positions (0-1-2) in part C of above diagram.

2. Before the watch is worn for the first time, wind the crown, by hand, 15 to 20 cycles by rolling the crown clockwise (away from you) while in the "0" (zero) position.
3. To set the calendar date window (part D): Pull the crown out to the "1" position and rotate the crown counter clockwise (toward you) for proper date selection.
4. To set the time: Pull the crown out to position "2" (part C) which will allow you to set watch hands for proper time selection. Once time is set, push crown back into original "0" (zero) position and tighten crown by turning clockwise.

## TIMESETTING CONT.

5. To set the month dial (part A): Press the month button (part B) to advance the hand. The month hand will advance one month at a time after each press of the button.
6. To set the day dial (part G): Press the day button (part E) to advance the hand. The day hand will advance one day at a time after each press of the button.
7. The 24-hour military day/night dial (part F) displays every hour of the day and is an added feature that does not require setting. The day/night dial is set by setting the time. Take this into consideration when setting the time on your watch.

## FEATURES

- \* 27-Jewel Automatic Movement
- \* Leather 9-3/4" Band
- \* Day/Date/Month Function
- \* Screw-down Crown
- \* Mineral Crystal
- \* Stainless Steel Case

## IMPORTANT

- Please remember to wear your Stauer watch each day to ensure its lifelong accuracy and dependability for your timekeeping needs. By continually wearing your Stauer watch, you will be taking full advantage of its state of the art automatic winding feature which, allows the watch to function utilizing your simple body movement. It can, however, be reactivated simply by instilling motion by being worn. When not wearing the watch, resting the watch on its side (with crown facing towards the ceiling) will help to keep more accurate time.

A Watch Winder is a great investment to ensure all of your Stauer wristwatches are keeping correct time and ready for you at any time! Take advantage of our Watch Winder offers on our website.
