- A - MONTH DIAL
- B - MONTH CORRECTOR KNOB
- C - CROWN
- D - CALENDAR DATE WINDOW
- E - DAY CORRECTOR KNOB
- F - 24 HOUR DAY/NIGHT DIAL
- G - DAY DIAL

TIMESSETTING

This watch features four distinct watch face displays: day dial, month dial, calendar date window and a 24-hour military sun/moon dial. The wristband features the added convenience of a quartz watch face to allow the setting for an additional time zone.

1. Locate the crown on your Stauer watch (above diagram part C). Due to the crown being machine tightened, you will need to unlock the crown to make setting adjustments. To unlock the crown, turn the crown counterclockwise (toward you) 5 or 6 times until you feel the crown “pop out” on the spring. Your crown is now unlocked and in the “0” (zero) position. Please note the three crown positions (0-1-2) in part C of above diagram.

2. Before the watch is worn for the first time, wind the crown, by hand, 15 to 20 cycles by rolling the crown clockwise (away from you) while in the “0” (zero) position.
3. To set the calendar date window (part D): Pull the crown out to the “1” position and rotate the crown counterclockwise (toward you) for proper date selection.
4. To set the time: Pull the crown out to position “2” (above diagram part C) which will allow you to position watch hands for proper time selection. Once time is set, push crown back into original “0” (zero) position and tighten crown by turning clockwise (away from you).
5. To set the month dial (part A): Press the month button (part B) to advance the hand. The month hand will advance one month at a time after each press of the button.
6. To set the day dial (part G): Press the day button (part E) to advance the hand. The day hand will advance one day at a time after each press of the button.
7. The 24-hour military day/night dial (part F) displays every hour of the day and is an added feature that does not require setting. The day/night dial is set by setting the time. Take this into consideration when setting the time on your watch.
8. To set the quartz watch face on the wristband, pull the crown out. “Note: there’s only one position” Turn the crown clockwise (away from you) to set the proper time. Once completed, push the crown back in.

ADJUSTING CLASPS

1. To shorten or lengthen a hook on our watch bracelet, lay the watch down on a soft surface, insert a flat tool (tweezers) in the groove on the tab and lift up. After setting the desired size press the tab locks securely into position.
2. To adjust a fold-over buckle bracelet, carefully remove only the pushpin from the bracelet side (not the buckle side), using a sharp pointed tool. Reposition the pin as required.

TACHYMETER

To use the Tachymeter function:

- 1) Unscrew the crown to normal winding position.
- 2) Pull out the crown when the second hand reach 60 of the Tachymeter. Scale and it will stop there.
- 3) Press the crown to normal winding position when you start to measure the speed.
- 4) Pull out the crown again when you reach destination.
- 5) Read the Tachymeter Scale where the second hand stopped. If it is stopped at 100, it means your speed is 100 KM per hour.

Please note that your watch will be out of time keeping function when you apply Tachymeter function as prepared as above.

Please remember to wear your Stauer watch each day to ensure its lifelong accuracy and dependability for your timekeeping needs. By continually wearing your Stauer watch, you will be taking full advantage of its state of the art automatic winding feature which allows the watch to function utilizing your simple body movement. It can, however, be reactivated simply by instilling motion by being worn. When not wearing the watch, resting the watch on its side (with crown facing towards the ceiling) will help to keep more accurate time.

A Watch Winder is a great investment to ensure all of your Stauer wristwatches are keeping correct time and ready for you at any time! Take advantage of our Watch Winder offers on our website. Visit us at, www.stauer.com to learn more about the fantastic benefits of owning a Watch Winder!
