- A - Month Dial
- B - Month Corrector Button
- C - Crown
- D - Calendar Date Window
- E - Day Corrector Button
- F - 24-hour Sun/Moon Dial
- G - Day of the Week Dial

TIMESSETTING

This watch features four distinct watch face display dials: day, month, date and a 24-hour military sun/moon dial

1. Locate the crown on your Stauer watch (part C). Please note the three crown positions (0-1-2) in part C of the diagram.
2. Before the watch is worn for the first time, wind the crown, by hand, 15 to 20 cycles by rolling the crown clockwise (away from you) while in the "0" (zero) position.
3. **To Set the Calendar Date Window (part D):** Pull the crown out to the "1" position and rotate the crown counter clockwise (toward you) for proper date selection.
4. **To Set the Time:** Pull the crown out to position "2" (part C) which will allow you to set watch hands for proper time selection.

Once time is set, push crown back into original "0" (zero) position.

5. **To Set the Month Dial (part A):** Press the month button (part B) to advance the hand. The month hand will advance one month at a time after each press of the button.
6. **To Set the Day of the Week Dial (part G):** Press the day button (part E) to advance the hand. The day hand will advance one day at a time after each press of the button.
7. **The 24-hour Sun/Moon dial (part F)** displays every hour of the day and is an added feature that does not require setting. The sun/moon dial is set by setting the time. Take this into consideration when setting the time on your watch.

FEATURES

- 27-Jewels
- Stauer Vertex Automatic Movement
- Moon-phase Dial
- Stainless Steel Case
- Genuine Leather 9 $\frac{3}{4}$ " Band
- Day/Date/Month Function
- Water Resistant 3 ATM

IMPORTANT

Please remember to wear your Stauer watch each day to ensure its lifelong accuracy and dependability for your timekeeping needs. By continually wearing your Stauer watch, you will be taking full advantage of its state of the art automatic winding feature which, allows the watch to function utilizing your simple body movement. It can, however, be reactivated simply by instilling motion by being worn. When not wearing the watch, resting the watch on its side (with crown facing towards the ceiling) will help to keep more accurate time.
