

WATCH DISPLAY

- A - MONTH DIAL
 B - MONTH CORRECTOR KNOB
 C - CROWN
 D - CALENDAR DATE WINDOW
 E - DAY CORRECTOR KNOB
 F - 24 HOUR DIAL-MOON PHASE STAR
 G - DAY DIAL

TIMESSETTING

This watch features four distinct watch face displays: day dial, month dial, calendar date window and a 24-hour military sun/moon dial. The wristband features the added convenience of a quartz watch face to allow the setting for an additional time zone.

1. Locate the crown on your Stauer watch (above diagram part C). Please note the three crown positions (0-1-2) in part C of above diagram.
2. Before the watch is worn for the first time, wind the crown, by hand, 15 to 20 cycles by rolling the crown clockwise (away from you) while in the "0" (zero) position.
3. To set the calendar date window (part D): Pull the crown out to the "1" position and

rotate the crown counterclockwise (toward you) for proper date selection.

4. To set the time: Pull the crown out to position "2" (above diagram part C) which will allow you to position watch hands for proper time selection. Once time is set, push crown back into original "0" (zero) position.
5. To set the month dial (part A): Press the month button (part B) to advance the hand. The month hand will advance one month at a time after each press of the button.
6. To set the day dial (part G): Press the day button (part E) to advance the hand. The day hand will advance one day at a time after each press of the button.

7. The 24-hour military sun/moon dial (part F) displays every hour of the day and is an added feature that does not require setting. The sun/moon dial is set by setting the time. Take this into consideration when setting the time on your watch.
8. To set the quartz watch face on the wristband, pull the crown out. "Note: there's only one position" Turn the crown clockwise (away from you) to set the proper time. Once completed, push the crown back in.

ADJUSTING CLASPS

1. To shorten or lengthen a hook on our watch bracelet, lay the watch down on a soft surface, insert a flat tool (tweezers) in the groove on the tab and lift up. After setting the desired size press the tab locks securely into position.
2. To adjust a fold-over buckle bracelet, carefully remove only the pushpin from the bracelet side (not the buckle side), using a sharp pointed tool. Reposition the pin as required.

A watch winder is a great way of keeping your automatic watch wound and keeping the main spring at optimal performance. Stauer watch winders are available online or call our specialist at 1-800-806-1484.

FEATURES

- 27-jewel automatic movement
- Secondary quartz movement
- Stainless steel case
- Stainless steel band with fold-over clasp
- Blue Mother of Pearl dial
- Water resistant to 3ATM
