

Stauer® SMART Executive

Smart Watch User Manual

Please keep for future reference.

Before You Begin

We suggest that you establish a full charge of your New Stauer Smart Watch using the included charging dock. A full charge will be indicated on the display screen.

The Watch Case

Wrist Band and Screen

Device requirements: iOS9.0 and above; Android 4.4 and above to support Bluetooth® 5.0. Android 6.0 and above devices need to be turned on to use GPS.

App Functions & Settings

Personal Information and Exercise Goals

After starting the App, set up your personal information.

- Me > Click Avatar**
- Head portrait, gender, age, height and weight can be added to enhance accuracy of your workout.
 - Customize your daily exercise goals.
 - Choose settings by selecting the gear icon. To choose measurement units, select "Unit" and select your preferred units of measurements for length, weight and temperature

Pairing with Your Smart Phone

Before using your Stauer Smart Watch, you will need to pair it with the App on your phone. After pairing, the watch will synchronize time and collect data for viewing in the App.

Bluetooth Connection: After successfully pairing, the Tefiti App will automatically save your Stauer Smart Watches Bluetooth address. While the App is open or operating in the background and is in proximity, it will automatically pair with the watch.

Data Synchronization: Pulling down on the home screen of the App will manually synchronize watch data. If needed, the watch is capable of storing collected data for 7 days before having to synchronize with your smart phone. Data collected for longer periods will lead to synchronization times of as long as 2 minutes

Wearing Your Watch

1. For best fit, wear the watch behind your "Ulnar Styloid Process".
2. Adjust the fit of the watch so that sensors on the back of the watch case remain in contact with your wrist.

Power On/Off

1. To start your Stauer Smart Watch, press and hold the upper right button on the watch.
2. To power down the watch, press and hold the upper right button, when "Power Off Your Watch" screen appears, choose on or off. The watch will vibrate as it powers down.

Using Your Stauer Smart Watch

1. With your Stauer Smart Watch turned on, you can swipe between screens to select the desired function.
2. Your screen will "sleep" after 5 seconds of idle time. This can be adjusted using the App on your smart phone among other features such as SMS reminders and call notifications.

Charging

1. Before first use, we suggest achieving a full charge your Stauer Smart Watch using the included charging base for best performance.

Bluetooth Connection

Data stored in your Stauer Smart watch including: steps, sleep time, heart rate, blood pressure can be stored in the watch for up to 7 days and will automatically upload to your phone when paired. To receive notifications for phone calls and text messages, you will need an active Bluetooth connection between your watch and smart phone.

Main Interface

- The watch has multiple functions that can be accessed by swiping between screens.
- After first pairing your smart phone with your Stauer Smart Watch time and date will be synchronized.
- To select one of the multiple watch interface options, press and hold your finger on the screen. Slide left/right to your preferred interface. Tap screen to set.

Message Push Interface
Swipe to "Message" interface to view current messages. Click and hold to view message history

Status Interface
Swipe to "Status" screen to view steps, miles walked and calories burned.

Exercise Interface
Swipe to "Exercise" screen. From "Exercise" screen tap to choose your preferred mode of exercise. Swipe up/down between exercise types, then tap selected mode to begin measuring selected activity. Press upper right case button to select pause or start of activity. Pausing the activity then pressing the upper right button clears the activity. To quickly access the "Exercise" interface, press the lower button on your watch bezel.

Heart Rate Interface
Swipe to "Heart Rate" screen to view your current heart rate. Be sure that the watch sensor is in firm contact with your wrist.

Blood Pressure Interface
Switch to the Blood Pressure Interface then tap the screen to start testing blood pressure. Once blood pressure test is complete, measurements will be shown on screen, or can be viewed in the Tefiti App. Pressing the upper side button will exit from the blood pressure mode.

Settings Interface
From the "Settings", screen tap to reveal options. Swipe up or down to select desired setting.

Reset will reset your watch to factory settings.

Info will reveal the watch's MAC Address and software version.

Brightness allows you to increase or decrease screen brightness.

Find Press and hold the "Find" interface and your phone will ring if within Bluetooth connectivity range.

Off will power down your Stauer smart watch. The watch will confirm shutdown by vibrating. To power up the watch, hold the upper bezel button.

To **Exit** from "Settings" press the upper bezel button.

Sleep Detection Function
When sleeping, the watch will enter sleep monitoring mode detecting your deep sleep/shallow sleep/waking time measuring your sleep quality. Data is stored and can be viewed in the Tefiti App.

Notification Functions
Notification functionality can be accessed from the Tefiti App. Select the application that you wish to receive notifications from. When your Stauer Smart Watch is connected by Bluetooth to your phone, notifications will be indicated by a vibration on the watch.

Call Notification: When your phone receives a call, the watch will vibrate as notification. If the caller's name is in the phone's address book, the caller's name will be shown on the watch. If the name is not in the address book, the caller's phone number will be shown.

Message Notification: When a text message is received, the watch will vibrate as notification. If the sender's name is in the phone's address book, the sender's name and message will be shown on the watch. If the name is not in the address book, the sender's phone number and message will be shown.

QQ Notification: When a QQ message is received, the watch will vibrate as notification and show the QQ Icon.

WeChat Notification: When a WeChat message is received, the watch will vibrate as notification and show the WeChat Icon.

Alarm Clock Notification
In the Tefiti App/Device>Alarm, you can set three different alarms. While connected with Bluetooth, The set alarms will cause the watch to vibrate.
Notification: When receiving emails or other types of information, your Stauer Smart Watch will give you the appropriate notification when enabled from the Tefiti App on your connected smart phone.

Sedentary Notification
In the Tefiti App/Device>Alarm, you can set three different alarms. While connected with Bluetooth, The set alarms will cause the watch to vibrate.

Charging
When the watch is connected to the charging base, notifications will be inactive during the charging process.

WeChat
When target steps set in the Tefiti App are reached, your Stauer Smart Watch will vibrate. Target Steps can be set in Tefiti App at App/Profile>Third Party Service>Connect WeChat.

Troubleshooting

Bluetooth Connection
Confirm that your device's operating system is Android 4.4 or higher, or iOS 9.0 or higher, and your device supports Bluetooth 5.0.

Possible remedies to non-pairing

- Signal interference in Bluetooth in your wireless device may cause loss of connection. If interference is present and a stable connection is not possible, check for magnetic or radio interference before proceeding.
- Turn off Bluetooth then restart.

- Restart the Tefiti mobile phone application or restart the mobile phone.
- APP is running normally in the background and may not be connected if it is not in the background.

If your Stauer Smart Watch can not be found in your phone's Bluetooth device list:

- Make sure that your smart watch is not already paired with another phone.
- Move your smart watch to a close proximity to your phone.
- Turn off your phone, wait for 20 seconds then reattempt the pairing your devices.

Troubleshooting (continued)

Measuring Your Heart Rate

- Your Stauer Smart Watch uses light reflected through your wrist's skin to calculate your heart rate. To ensure an accurate reading, wear your watch so that the sensor on the back of the watch case remains in close contact with your skin.

Reminders

Android: Confirm that the phone and watch are connected through Bluetooth. Then open the "Tefiti" App and keep it running in the background. If the phone has security software installed, add "Tefiti" to "trust"

iPhone: Ensure that your phone is paired with your smart watch. If the phone is not paired with the watch, restart the phone then check your phone's Bluetooth settings to verify that it is now paired.

Is the Stauer Smart Watch waterproof?
The watch supports IP68 waterproof and dust proof level protection.

Saved Data
Until the watch syncs with your smart phone, seven days of data can be stored on the watch. Once the watch is synced with your smart phone, stored data will be transferred from the watch to the phone. Be sure to sync your phone and watch on a regular basis to avoid losing recorded data.

Care of your Stauer Smart Watch

- Avoid strong impact, extreme heat
- To avoid damage to the watch, do not attempt to disassemble or open its case.
- The watch is charged with 5V, 500MA. Do not attempt to overcharge the watch to avoid damage.
- The watch is designed to operate within the temperature range of 32 and 113 degrees Fahrenheit.
- Do not dispose of the watch into a fire as the battery might explode.
- Remove water from the watch with a soft cloth to avoid developing corrosion on charging contacts.
- Avoid contact with solvents, gasoline, alcohol or insect repellent as it can damage the watch face and case.
- Do not use the watch in high pressure or high magnetic environment.
- After swimming dry the watch with a soft cloth or towel.
- Avoid prolonged contact between the strap with soap, sweat, allergens and pollutants which may cause skin allergy or itching.
