

## WATCH DISPLAY

## TIMESETTING

- A - Day of the Week Dial
- B - Day Setting Button
- C - Crown
- D - Date Dial
- E - Date Setting Button
- F - Sun/Moon Dial

### TO SET THE TIME

1. Locate the crown on your Stauer watch (part C). Please note the three crown positions (0-1-2) in part C of above diagram.

2. Before the watch is worn for the first time, wind the crown, by hand, 15 to 20 cycles by rolling the crown clockwise (away from you) while in the "0" (zero) position.

3. **To set the time:** Pull the crown out to position "2" (part C) which will allow you to set watch hands for proper time selection. Once time is set, push crown back into original "0" (zero) position.

4. **To set the Day of the Week dial (part A):** Press on the Day Setting button (part B) once for each day to advance for proper day selection.

5. **To set the Date dial (part D):** Press on the Date Setting button (part E) once for each date to advance for proper date selection.

6. The day/night dial (part F) does not require setting. The Sun/Moon dial is set by setting the time. Take this into consideration when setting the time on your watch.

## IMPORTANT

Please remember to wear your Stauer watch each day to ensure its lifelong accuracy and dependability for your timekeeping needs. By continually wearing your Stauer watch, you will be taking full advantage of its state of the art automatic winding feature which allows the watch to function utilizing your simple body movement. It can, however, be reactivated simply by instilling motion by being worn. When not wearing the watch, resting the watch on its side (with crown facing towards the ceiling) will help to keep more accurate time.

## FEATURES

- Automatic movement
- 27-jewels
- Stainless steel crown, caseback and bracelet
- Date, Sun/Moon and Day subdials
- Water resistant to 3ATM
