

WATCH DISPLAY

- A - Hour Dial
- B - Minute Dial
- C - Crown

SETTINGS

Instead of the typical hands you see on most watches, this watch features unique hour and minute dials. The time is indicated by the 2 arrows which point to the hour and minutes. In the diagram to the left the time is 10:25.

TO SET THE TIME

1. Before the watch is worn for the first time, wind the crown (part C) by hand, 15 to 20 cycles by rolling the crown clockwise (away from you) while in the "0" (zero) position.
2. To set the hour and minutes, pull the crown out to position "1" and turn it to select the correct time. The Hour dial (part A) at the top rotates and the hour is indicated by a small red arrow at the center top. The Minute dial (part B) uses a larger red arrow to indicate the minutes on the outer dial.
3. Once time is set, push crown back into original "0" (zero) position.
