

WATCH DISPLAY

- A - Crown
- B - Day of the Week
- C - 24 Hour Dial
- D - Date Window
- E - Second Dial

TIMESETTING

Locate the crown on your Stauer watch (part A) and note the three crown positions (0-1-2).

SETTING THE TIME

1. Pull the crown (part A) out to position “2” and rotate it clockwise to the desired time.
2. Once the correct time is set, push the crown back into “0” (zero) position.

Advanced Time Setting Techniques

- When setting the hour hand, check that the 24-hour hand is correctly set.
- When setting the minute hand, advance it 4 to 5 minutes ahead of the desired time and then turn it back to the exact time.

TIMESETTING

SETTING THE DATE

1. Pull the crown (part A) out to position “1” and rotate it counter-clockwise to the desired date.
2. Once the correct date is set, push the crown back into “0” (zero) position.

Advanced Date Setting Techniques

- Do not set the date hand between 9:00 p.m. and 1:00 a.m. Otherwise, the date may not change properly.
- While setting the date hand, check that it moves properly in one-day increments.
- It is necessary to adjust the date on the first day after a 30-day month and February.

TIMESETTING

TO SET THE DAY

1. Pull the crown (part A) out to position “2” and rotate it clockwise to the desired day.
2. Once the correct time is set, push the crown back into “0” (zero) position.

Advanced Day Setting Techniques

- To advance the day hand quickly, turn back the hour and the minute hands 4 to 5 hours beyond the point of the day changes (between 11:00 p.m. and 4:00 a.m.), and then advance them again until the day hand is set to the next day.

**Note:** The day hand will not move back by turning the crown clockwise.

- After the day hand reaches the last day of the week, turn the crown clockwise and the hand will return to the first day of the week (retrograde day indicator).

TO SET THE 24 HOUR DIAL

The 24 Hour Dial (part C) corresponds to the hour hand and requires no additional setting.
