

WATCH DISPLAY

A - Crown

B - Open heart display

TIMESSETTING

Locate the crown on your Stauer watch (part A) and please note the three crown positions (0-1-2).

Before the watch is worn for the first time, wind the crown, by hand, 10 to 15 cycles by rolling the crown clockwise (away from you) while in the "0" (zero) position.

TO SET THE TIME

1. Pull the crown (part A) out to position "2" and rotate it to the desired time.
2. Once the correct time is set, push the crown back into "0" position.

AUTOMATIC INSTRUCTION

Automatic movements contain no battery. They are powered by a coiled mainspring that is charged by either winding manually by the crown or from the rotating pendulum attached to the movement that rotates through the natural movements of your arm while wearing the watch. The watch is self-winding and will continue to charge at all times while being worn. When an automatic watch is not worn, and not manually wound by the crown, it will wind down and stop running.

FEATURES

- Automatic movement
- Open heart display at 6 o'clock
- Genuine leather strap
- Water resistant to 3 ATM
